Procedure:
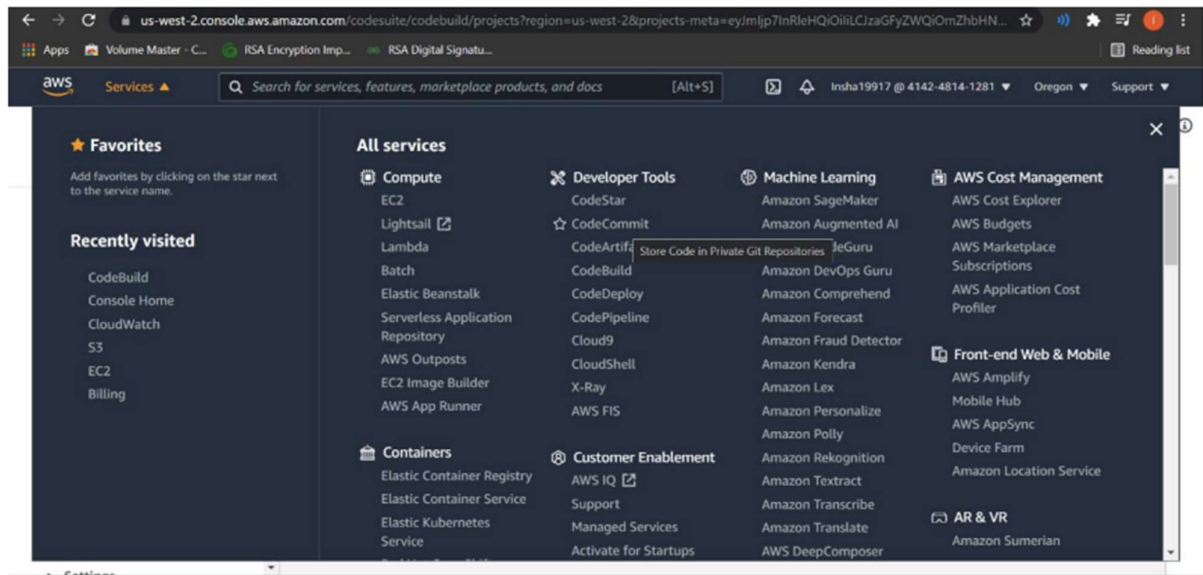

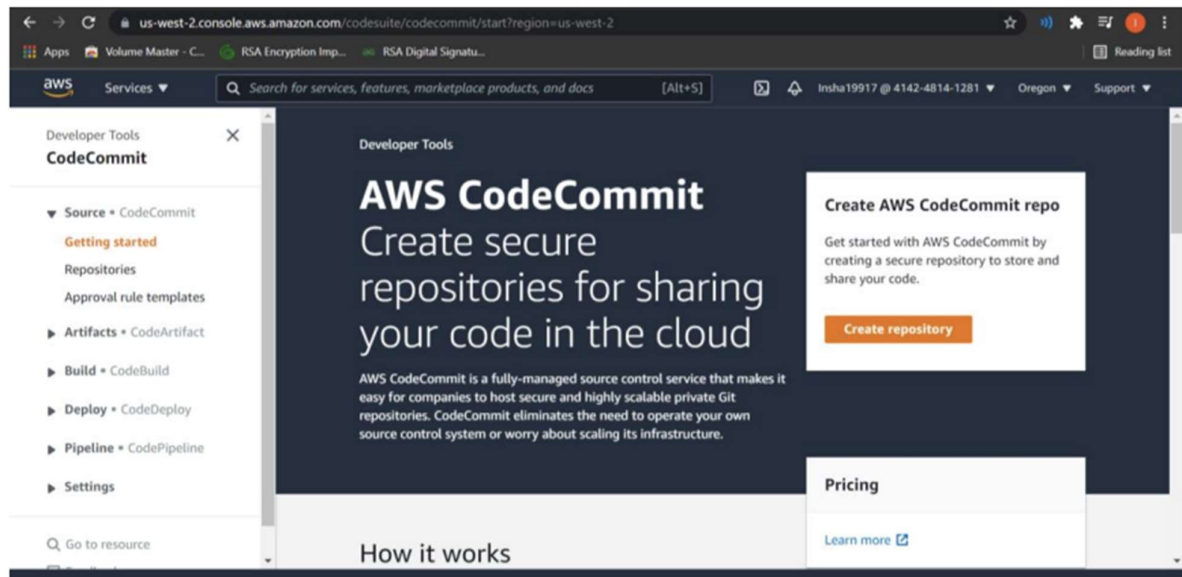

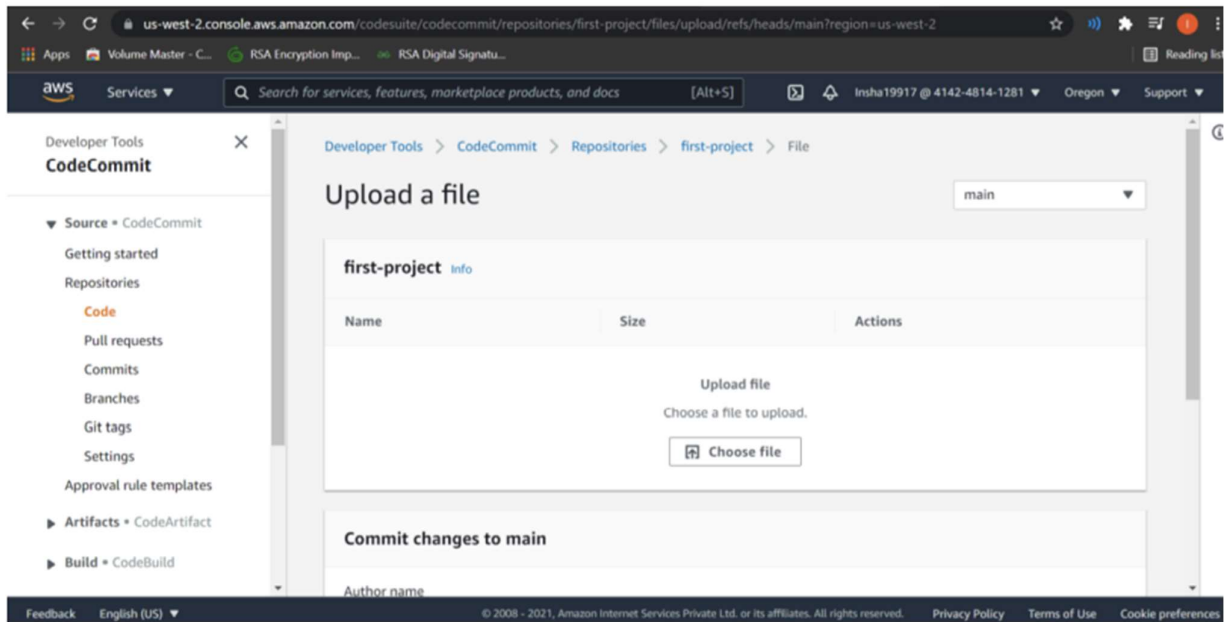

1. In services, click on "CodeCommit"

2. You will see the following page

3. Click on create repository and create a new repository. In may case, I have already created that. So, I won't create that again.

4. Now we'll commit a code. So, click on "Add a file" or "Upload a file".

5. Now click on "Choose a file". Choose your program file and fill the details in the textbox given below. Click on "Commit changes".

6. You can see that your code has been committed.
